

PRYDE SCHROPP McCOMB INC.

FEATURE PROJECT PROFILE

Ottawa International Airport Sign Audit and Rehabilitation

Pryde Schropp McComb, Inc. (PSMI) was retained by Ottawa Macdonald-Cartier International Airport Authority to conduct a detailed review of Airfield Guidance Signs in place at the Ottawa International Airport.

The work involved a detailed GPS Survey of every airfield guidance sign at the airport and compliance verification against the latest Transport Canada TP312 Aerodrome standards. Following the compliance verification, a complete redesign of all sign locations and content was undertaken by PSMI.

This project involved consultation with Airport Staff and Transport Canada to ensure that both regulatory requirements and operational concerns were carefully considered during the design phase of the project.

PROJECT LOCATION

Ottawa, Ontario, Canada

PROJECT TYPE

Engineering & Project Management
Planning & Regulatory

CLIENT TYPE

Airport Authority

CLIENT NAME

Ottawa Macdonald-Cartier
International Airport Authority

PROJECT DURATION

2005-2007

PROJECT VALUE
